PROJECTS

Personal Portfolio — Built using HTML, CSS, Java Script

Created a modern, responsive portfolio website using HTML for structure, CSS for design, and Javascript for adding interactivity, highlighting various web development projects. Emphasized a mobile-first design, ensuring an intuitive and seamless user experience across devices, with focus on performance optimization and cross-browser Compatibility.

E-commerce Website — Built using React js

Developed a dynamic, user-friendly e-commerce website using React.js for the frontend, focusing on creating an engaging shopping experience. Utilized React components to build a modular and responsive interface, including product listings, a shopping cart, and a checkout page. Implemented state management with React hooks for real-time updates and smooth interactions. Emphasized mobile-first design to ensure the site is fully responsive across devices, while integrating React Router for seamless navigation. Focused on performance optimization and cross-browser compatibility to deliver a fast, reliable, and consistent user experience with focus on performance optimization and cross-browser Compatibility.

Student Management — Built using Java And SQL

Developed a Java-based application integrated with MySQL to manage Students data, including features and Validation.
